Avg. Yield change is expressed in percentage terms. If the yield went from $8 \%$ to $7 \%$ the calculation would be $-12.5 \%$, not $-1 \%$. Also the column that shows the percentages of funds with dividend changes includes funds with increases, and is meant to help show which areas of the CEF universe are likely to have a higher number of funds that change their distribution policies.

Index Data from Thompson Reuters. CEF data from CEF Universe Data and Yahoo Finance.

* Over the 43 month period, US CEFs went from yields of $6.1 \%$ yields to $8.1 \%$ and Non-US CEFs went from yields of $4.9 \%$ to $6.1 \%$. Many of the dividends came as semi-annual or annual dividends and were driven by pass through capital gains vs. income to maintain the tax-beneficial status for the fund itself.
